YELIM KI

Yelim Ki(KR/NL) is a multidisciplinary artist who challenges the intersections of cinematic images mediated on screen and material reality through video, sculpture, and interactive media. Grounded in animism and media archaeology theory, her work critically examines the promises and illusions of technological permanence.

Yelim Ki takes fiction writing or linguistic structure as a prompt of each project and embodies her interests into audiovisual results through the collaboration with people in various fields. Based on her critical approach to contemporary technological culture, she explores the poetic use of computer languages or materializes 3D digital media into sculptures, creating a structure in which artworks transfer through reality and fiction, media and processes. Ki had a solo exhibition at Bio gallery (2024) and won the Special Jury Prize at Jeonju International Film Festival (2022). Her work has been shown at various venues and events such as MMCA Seoul, e-flux Film & Video Festival, Instrument Inventors(iii), EXiS (Seoul Experimental Film and Video Festival), ACC (Asia Culture Center Cinematheque) and more. Her works are archived in SeMA AA(Art Archives, Seoul Museum of Art), KOFA(Korean Film Archive).

2023 ☒Gnome☒ Alterside Seoul, Zuid-Korea 99betaHUD (Yelim Ki, Jihyoung Han) prophecies contemporaneity through the mouth of a "gnome," an earth spirit with the appearance of an old man. The gnome searches for subjectivity through evidence in the world they experience, and this potential being speaks of speculative allegory, the chimeras of matter, language, and history by speaking his words to describe the multiple systems and structures that make up our accelerated world.

2022 ☒Fountantine☒ SAGA Seoul, Zuid-Korea Team 99betaHUD (Yelim Ki, Jihyoung Han) jointly wrote scores with a series of rules with multiple images discovered during the production of the work, produced architectural elements such as walls, lighting, and paintings, and conducted an exhibition at two physically separated exhibition spaces Saga(Seoul KR) and Sansussari(Gwangju KR). In 2021 at SVC Seoul(Visual Culture Society) which is a research group, the two artists studied cases in which the object-oriented ontology of non-human objects can be applied, after reading and . In this process, they shared opinions on technical image generation steps such as digital painting, creative writing, and processing, and paid attention to arbitrary rules or cooperative processes that occur. They practice their creative implications by expanding to methods that can be applied to score writing and arrangement of works within the exhibition space.

2021 ☒Project Hashtag 2021: What's Happening?☒ MMCA (National Museum of Modern and Contemporary Art) Seoul, Zuid-Korea 'After New Order…' is a practical collective that explores what is happening on the web. Their interests include user autonomy, accessibility, and anti-platform and more. They attempt to embody their questions and practices in forms of websites, installations, workshops, and publications. The web, which once advocated openness, sharing, and participation, still remains an unequal space depending on the country, gender, and the presence or absence of disabilities, deepening the discriminatory aspect of society. The web ecosystem reorganized around the giant platform limits the acquisition of subjective information by users and makes the web a passive

and closed space. In addition, large data centers, which are running 365 days to meet record-high data processing demands, emit huge amounts of greenhouse gases and cause environmental pollution. ‘After the New Order...' examines the problems caused by the web at the conceptual and practical perspective, and presents seven projects on this at the exhibition of Project Hashtag 2021 at the National Museum of Modern and Contemporary Art. www.e-flux.com/announcements/421736/after-new-order-the-duck-among-us/

PUBLICATIES

2025 Teenage Lightning: Cinematic Apparatus On Humanly Perception Boek Self publish Yelim Ki Den Haag, Nederland www.rile.space/books/teenage-lightning-cinematic-apparatus-on-humanly-perception The book explores how we experience perceptual dissociation and deep immersion when engaging with screen media. Drawing from perspectives such as media criticism, psychological states, and the evolution of visual technology in cinema, it examines how our senses respond to screens. A central theme is the reconsideration of animism—the belief that objects or images possess life—as a fundamental, primitive form of cinema. The work also reflects on the relationship between light and the screen, integrating my own artistic practice in film, light, and interactive media.

2021 What's happening? 1,2 (Anthology) Boek after new order... after new order... (collective) Seoul, Zuid-Korea thebooksociety.org/29/?idx=554 Something that never gets smaller. Something that expands every moment. The World Wide Web. ☒What's Happening☒, which examines 'what's happening' there, introduces overseas discourses surrounding the web in Korean. The inaugural issue, What's Happening 1 - What's Happening?, focuses on two topics: the basic spirit of the web and web accessibility. The web, which was created in 1989 by CERN (European Organization for Nuclear Research) to systematically share scientific papers, has 'openness, sharing, and participation' as its basic spirit, but it still remains an unequal space based on country, gender, and disability, deepening the discriminatory aspects of society.
