## PROJECTEN

2019 Ademruimte calmspaces Den Haag, Nederland
calmspaces.nl a research project where a group of specialised designers, healthworkers, urbanists and architects come together to design a public space for rest, contemplation and silence; something that is missing in modern cities. The main topic is the interaction with breathing, which through a combination of sensor technology, interior, architectecture, light and sound design get interwoven into a spacial design.
