

## NESIE JUNYI WANG

My practice bridges art and research to explore the intricate relationships between humans and the environments they inhabit. Drawing on field studies and material investigations, I work across mediums such as photography, printmaking, and film to examine narratives that emerge from spaces in transformation. These stories reveal how beings adapt to and interact with shifting landscapes, navigating the tension between order and uncertainty. Collaboration, locality, and materiality lie at the core of my practice. Grounded in fieldwork that prioritizes lived experiences, I trace the subtle, evolving dynamics of shared spaces, creating work that uncovers situated stories and reflects on the fluid boundaries between ecological systems and cultural narratives. Through this process, I explore how these layers intertwine, reshaping our understanding of human-nonhuman entanglements and challenging the constructs that separate us from the environments we inhabit.

2026 Practicing Eco-Social Futures: VOICE Artist Showcase RCA  
Battersea London, Verenigd Koninkrijk The VOICE Artist  
Showcase will take place in London on 30–31 March 2026,  
hosted by the Royal College of Art (RCA) at its Battersea  
campus. Marking the final phase of the VOICE project (GA  
101135803), the event celebrates the outcomes of a multi-  
year collaboration between artists, industry partners, and  
communities. [www.voice-community.eu/news-and-

2025 Temporarily Out of Place Treehouse NDSM Amsterdam,  
Nederland Sustainability and circularity may sound like well-  
worn concepts by now. Yet in Temporarily Out of Place, ten  
artists at Treehouse NDSM show that sustainability goes far  
beyond the reuse of materials and objects. Creating a more  
sustainable world requires us to re-examine the systems,  
habits, and assumptions that shape our daily lives.

### PROJECTEN

2025 Flows-rond: Reimagining Urban Water  
Relations Buurtwerkplaats Noordenhof  
Amsterdam, Nederland Based at  
Buurtwerkplaats Noorderhof, this project  
explores the hidden water infrastructures of  
Slotterplas through participatory research  
and events. Introducing Kaamera, a  
biopolymer made from wastewater, it brings  
local communities into conversation with  
the flows beneath the city. The project  
focuses on the often unseen water  
infrastructure around the neighbourhood of  
Slotterplas—water systems, the human  
impact, and how it all connects to the  
landscape around us. The project is  
funded by a Horizon Europe project called  
VOICE ([https://www.voice-  
community.eu/](https://www.voice-community.eu/)). Through artist-led  
interventions (ATSI), VOICE encourages  
citizen engagement to tackle local and  
regional environmental challenges  
effectively.

roots, unearth (2024), as the winner of 2024 Blurring the Lines. Ever since 2012, Time Space Existence has been presented as the extensive biennial architecture exhibition organised and hosted by the European Cultural Centre that contemplates the fundamental philosophical concepts of Time, Space and Existence. It brings together an international and eclectic group of participants working across different disciplines who present completed and ongoing projects, innovative proposals, and utopian dreams of architectural expressions focusing and reflecting upon these topics in line with contemporary discussions.

Fletcher and Alice Cazenave from The  
Sustainable Darkroom are joining forces  
with artist and designer Tamsin Green,  
founder of the Sustainable Photobook  
Publishing (SPP) network. Together, they've  
created the theme: "New Grounds." This  
theme considers the critical need to find  
new grounds for navigating volatile  
environments, and for building new worlds  
to come.
